

I pay for satellite radio every month. As such I do not understand how we can limit a public service from being offered on the various satellite radio services. I am in an area that does not receive the weather and traffic service. I am hoping they will offer it soon. It is a continuous service. On regular radio I have to wait until they want me to hear it (usually after 5-6 commercials)

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve.
